ALIEN INVASION

*"I'm thrilled to be presenting this body of work from another planet.
'Alien Invasion' truly translates the vision of an enormously talented and
creative artist. Gallery Valentine is excited to be representing Kevin Berlin."*

-Ryan Ross, Gallery Valentine

ALIEN INVASION

WIKIPEDIA

The **alien invasion** is a common theme in [science fiction](#) stories and [film](#), in which [extra-terrestrials](#) invade Earth either to exterminate and supplant human life, enslave it under [a colonial](#) system, harvest humans for food, steal the planet's resources, or destroy the planet altogether. However, not all alien invasion stories follow this plot. In some accounts, the [alien invaders](#) will covertly subvert human society using disguises, [shapechanging](#), creating conflict in humanity and let humans destroy themselves, or human allies.

"The fact that we don't see aliens all around could mean two things: they don't exist, or they are very good at not being seen. In the tradition of Stephen Hawking and Carl Sagan, artist Kevin Berlin is asking all the right questions."

-Corey S. Powell, Discover Magazine
